WHAT IS A NOTARY:

A notary is a person commissioned by the State whose job is to verify two things about the person signing a document that requires notarization:

- That the person signing the document is indeed the person named in the document. This is to protect you from identity theft.
- That you understand the content of the document being signed. This does *NOT* mean that the notary explains the document to you, but rather that you have read the document thoroughly and understand that the terms and conditions will be legally binding upon signing.

It is important to understand that a notarized document is legally-binding and can stand up in a court of law.
